💼 WORK EXPERIENCE

CAPCO - IT Berater   2015.05 - Currently

Supported the Request for Proposals process by contributing technical and engineering expertise, ensuring comprehensive and robust solutions tailored to client requirements. Led the design, implementation, and organization-wide rollout of an AI-based tool to automate the creation of work items in JIRA, utilizing Python for backend development and React. Demonstrated a hands-on approach in both requirements analysis and technical delivery, bridging business goals with innovative, scalable software solutions.

- Techstack: Python, Azure OpenAI, Autongen, Langgraph, Jira, Confluence,

BOJSEN CONSULT GMBH - Senior Consultant   2024.08 - 2025.01

As a senior consultant, I support IT projects - both external (customer projects) and internal products such as the "Conference App" and "Medical Forms". This support includes various tasks from conception, design and implementation to the publication of the software. In addition, I documented our architectural decisions (arc42 template) and continuously developed them to make the onboarding of new employees more efficient and smooth.

- Techstack: .Net Core (C#), EF Core, Azure, MAUI, Blazor, WebApi, MVC, Bootstrap, CSS, Angular +, Docker, Radzen, GitHub.

ITF - CBTW - Senior Consultant (Team Lead)   2019.02 - 2024.07

Conception, design and development of multiple projects in the financial sector, from mission-critical standalone software to global websites. By using agile methods such as Scrum, I was able to work with business and technical stakeholders to define the most important requirements and interfaces and, if necessary, identify new ones. To ensure software quality, I applied proven testing methods and design principles. (Customers: LBBW, Société Générale and Commerzbank)

- Techstack: GitLab, Jira, Confluence, Microsoft-Tech Stack (.Net Core, EntityFramework 6, MVC, Web API, C#, Windows Services, JS, Jira, NUnit, TeamCity, SQL Server).

MERKURIST GMBH - Senior Software Developer   2017.04 - 2019.02

As a member of an agile team that lived Scrum, I was responsible for developing the single page application with AngualrJs with connection to Azure cloud services using SOLID and CleanCode for availability 24 hours/7 days a week. Another focus was coaching and supporting junior developers

- Techstack: AngularJS, MVC5 C#, HTML5, CSS3, JavaScript (ECMA 5 + 6), Jquery, REST Api, Dapper, Moq, NUnit,, Handlebars, Node.Js, Inversion of Control (IoC),SQL Server, Elastic Search, Kibana und Loadstash

🎓 STUDIES   *and even more…*
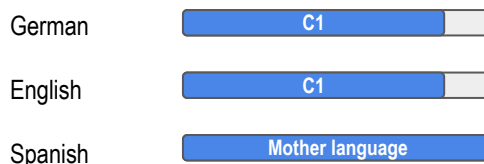

SOFTWARE ENGINEERING - Degree   2006.01 - 2013.10

Develop systems for information management using various technologies that draw upon knowledge from mathematics, software engineering, and other tools.
